

4A.Vogel – Pioneer in Phytotherapy

The Swiss company A.Vogel AG conducts ongoing clinical research to examine and substantiate the efficacy and safety of herbal medicines. This is particularly true for *Echinacea purpurea* (purple coneflower), the world's most extensively researched medicinal plant.

Founded by the renowned Swiss natural medicine pioneer Alfred Vogel (1902–1996), the company specializes in producing and distributing medicines made from freshly harvested, organically grown medicinal plants. Thanks to more than 120 quality checks and the principle of scientifically proven efficacy, A.Vogel enjoys a strong reputation among universities, healthcare professionals, and patients alike.

*„Nature was my best loved university.“
(Alfred Vogel)*
